

- 3 -

No. 4), presented herewith are new claims 4-8 which relate to an embodiment of the present invention in which the fractional binding site occupancy of a plurality of binding agents by a plurality of analytes is determined by means of site-recognition reagents labelled with markers from which the fractional binding site occupancy is determined for each binding agent.

This embodiment of applicant's invention is described in the present specification at pages 6-9, 13 and 14, and in particular at page 6, line 31 through page 7, line 6 and page 14, lines 10-18.

Favorable action on newly presented claims 4-8 is respectfully requested.

Respectfully submitted,

DANN, DORFMAN, HERRELL AND SKILLMAN  
A Professional Corporation
